CUSTOMER SUCCESS STORY

Learn how Church Streaming is becoming easier than ever before

Be sure to check out PTZ Optics and ChurchStreaming.TV at the WFX show this year!

ChurchStreaming.TV has partnered with PTZ Optics to provide an affordable PTZ camera that works with the ChurchStreamer. The set up is amazingly simple and users can easily take the system wherever they need to go (you just need power and the internet). The "Church Streamer" device only needs to be plugged into the internet, a camera and your audio system. Depending on how far away your camera needs to be you can connect via HDMI or HD-SDI (HD-SDI is preferred for longer cable runs). The entire system can live stream audio and video in full HD 1080p! It's a home run set up for most churches who already have an audio mixer in place.

PRODUCT DETAILS

PTZ Optics 12X & 20X USB

Powerful PTZ capabilities with USB 3.0 inputs feeding directly into the live streaming laptop.

ChurchStreaming.TV Device

Options for HDMI and HD-SDI video and simple 3.5mm audio. This streaming box is the easiest set up you can find!

Wirecast

Live Streaming Software

Wirecast is used for video production and streaming. ChurchStreaming.TV uses Wirecast for scheduling broadcasts.
