

## WirelessCable Quick Start Guide

The PTZOptics pre-paired WirelessCable units are plug-and-play and allow for easy connection to any device that contains a LAN port. Simply connect one of the WirelessCable units to your PC or network switch, and the other end to your device or network switch. When the “Link” LED glows on the Base Units, the connection is complete and you’re ready to use your device.

1. Connect the antennas & power supplies to the WirelessCable units

2. Connect the 1<sup>st</sup> WirelessCable to your LAN

3. Connect the 2<sup>nd</sup> WirelessCable to your device

4. Power on both WirelessCable units

5. Verify the “Link” LED is illuminated. This may take a moment.

6. Begin using the device with the PTZOptics WirelessCable!
